

ICT literacy of Nigerian secondary students

By Onyenekenwa Eneh

LAP Lambert Acad. Publ. Jun 2011, 2011. Taschenbuch. Book Condition: Neu. 220x150x5 mm. This item is printed on demand - Print on Demand Neuware - Education is a veritable means of human capital development. The senior secondary education equips its beneficiaries for the job market or tertiary education. For the senior secondary school leaver to fit into either market, now increasingly driven by the ICTs, computer literacy counts. Therefore, it is right that Nigeria's basic and senior secondary education curricula provide for computer education. But, reports show that Nigeria, as one of the developing countries in the sub-Saharan African region, is backward in ICTs. For the senior secondary school leaver, this might constitute a threat to employment and further education. The ICT literacy of Nigerian secondary students is a report on the assessment of the ICTs literacy levels among some randomly selected final year (senior secondary or SS III) students of some randomly selected public and private Senior Secondary Schools in Enugu Education Zone of Enugu State of Nigeria. The selected students were practically tested in word processing, ability to access the Web for browsing, and ability to manage Web contents. 84 pp. Englisch.
