

Report on the great earthquake of 12th June 1897 Volume 29

By Richard Dixon Oldham

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 160 pages. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1899 Excerpt: . . . The middle of this break, therefore, represents 16 on the 12th June. The usual sensitiveness of the photographic paper used at this Observatory has been ascertained by experiments with a steady light, and found that an exposure of about 4 to the usual kerosine burners (of about 4 candle power intensity) used, is enough for action; and with regard to impression of light during the vibration of the magnet, it is found that oscillations of amplitude of 3 divisions of the scale, equal to a displacement of about 28 minutes of declination and upwards, are not recorded; the velocity of the speck of light, together with the motion of the paper, a little over half an inch in one hour, precludes photographic action unless the amplitudes are brought within the above limit, and naturally the first impressions produced are at the extreme ends of the amplitude, where the velocity is a minimum. It...
