Why won't their baby sleep? What is the best position to put him down in, and is swaddling the answer? Are monitors - or even dummies - a good idea? What about the mother's need for sleep - or the father, and the rest of the family? And how does the situation change when the baby is older, say three to six months, or coming up for a year? What are the sleep needs of a toddler, or an older child? And how should parents manage when the whole routine is thrown into the air, because the baby is teething, or has been ill?
