By John C Hoyt

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Water Supply of Nome Region, Seward Peninsula, Alaska The successful operation of a placer deposit depends primarily upon the water supply. Data in regard to this supply are essential to its economical development, and lack of such information in regard to the flow of streams has often caused financial failure in mining as well as in other enterprises which depend on water. For a number of years the United States Geological Survey has made in the United States systematic measurements and studies of the water supply as one of the great resources of the country. These data are now available for all of the more important streams, and are extensively used by engineers and others in problems involving water power, city water supply, irrigation, and manufacturing. During the season of 1906 the Survey extended these investigations to Alaska in order that information in regard to water supply may be available for the economical development of the placer mines and water power of that territory. The field work was carried on from June 11 to October...
