RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 160 pages. Original publisher: Urbana-Champaign, Ill. : Civil Engineering Studies, Civil Engineering Systems Laboratory, University of Illinois, 1990 OCLC Number: (OCoLC)65192192 Excerpt: . . . CHAPTER 1 INTRODUCTION 1. 1. OVERVIEW OF THE PROBLEM Engineers and scientists rely upon numerical methods to solve complex analytical problems. The analysis of such problems has been facilitated by technological advances in electronic computation. The availability of general purpose computers has influenced the development and application of numerical methods in both engineering and in the sciences. This report addresses the issues related developing large scale software for engineering applications on computing hardware known as Multiple Instruction stream Multiple Data stream ( MIMD ) computers. The issues examined herein include the ability to develop architecture-independent software applications and the data management aspects of engineer-ing problems. The finite element method ( FEM ) is used as a focus problem throughout the report. The method grew out of the need to solve structural analysis problems in the aerospace industry during the late 1950 s. Since then, FEM techniques have evolved rapidly, and are now established as a basic method for the analysis of complex engineering...

### Reviews

*The ebook is straightforward in go through preferable to recognize. It typically does not charge too much. Its been designed in an exceptionally straightforward way and it is just following i finished reading this book where basically altered me, affect the way i really believe.*

-- **Dr. Reta Murphy**

*It becomes an amazing pdf which i actually have at any time read through. This can be for all those who statte there had not been a worthy of reading through. You wont sense monotony at anytime of your own time (that's what catalogues are for relating to should you check with me).*

-- **Claud Kris**
